

# ENDLESS ENTREPRENEURIAL CHARACTER

*from Greenville, SC Addresses A Joint Session Of Congress*

## **SERGEANT OF ARMS:**

Madam Speaker the  
Endless Entrepreneurial  
Character from Greenville,  
SC!

*[Applause, "Endless" is making his  
way to the podium. A handsome guy  
being 600 years of age. Mighty fine!  
Let's tune in.]*

**ENDLESS:** Thank you!  
Thank you!, Thank you!

Madam Speaker, Madam Vice  
President, The Honorable Justices of The Supreme  
Court, Surgeon General, Mr. President, Families,  
Friends, The American People, Allies, and People  
Throughout The World.

You've never met someone 604 years of age. I've been  
making appearances throughout history. A better life, a  
better future and better living is on the horizon. America  
is experiencing a micro and macro cultural and societal  
evolution. Do we have the resources to solve this need? Yes,  
America does and it doesn't cost anything.

The first resource. In your family. Parents look your son or  
daughter in the eyes and authentically honestly say, "Son, I  
love you" or "daughter, I love you."

On the next day, children look your parents in the eyes and  
authentically honestly say, "Mom, I love you" and "Dad, I  
love you."

On the third day, brothers and sisters look each other in the  
eyes and brother authentically honestly say, "Sister, I love  
you" and say, "brother, I love you."

On the fourth day, sisters and brothers look each other in  
the eyes and sister authentically honestly say, "Brother, I love  
you." and "sister, I love you."

The second resource, your  
mind and mentality is your  
most priceless possession.  
Why do I see some people  
denigrate their own mind and  
mentality or another person's  
mind and mentality? That's  
mental abuse!

Mr. Washington substitute  
taught Mrs. McCormick's  
eight grade English class. On  
his first day of class he said,

"We do not call ourselves or another person  
dumb or stupid." Believe me no one did so in class.  
If you are one to do so, stop it and prevent it. That's the  
right way. Apply the learning.

Seeing the atrocities occurring throughout the world it's  
time for you to grow your family, faith, philosophy of life,  
or nonfaith, culture, and identity by sharing your faith,  
philosophy of life, or non-faith, culture, and identity  
without putting each other on the defensive. Epistemology  
research and studies show the high- value of doing so for  
greater peace, better education, better health, better jobs,  
economic mobility, and greater prosperity for each person  
to thrive.

By doing so, you experience liberation, create authentic  
honest dialogue, and the echoes of freedom continues to  
ring.

Global advancements in technology, collaboration, and  
cooperation amongst countries makes this easier.

These three high- value creative innovative ideas catalyze  
independence, a thriving democracy, entrepreneurial vigor,  
and a spirited beacon of hope to solve the major needs of the  
American people.

God Speed and God Bless the United States of America!  
*Affectionately "Endless", Greenville, SC*
